

# President's Malaria Initiative (PMI)

Roll Back Malaria Partnership,  
Scalable Vector Control Working Group  
24 October, 2007

Michael Macdonald, USAID  
Ellen Dotson, CDC

[www.pmi.gov](http://www.pmi.gov)

- PMI Goal, Strategy, Scope, and Progress
- Vector Control
  - Insecticide Treated Mosquito Nets
  - Indoor Residual Spraying
  - Cross cutting issues:
    - Environmental Assessments
    - Monitoring and Evaluation
    - Training

Goal (2010): Reduce malaria-related mortality by 50% in 15 focus countries.

Targets: Achieve 85% coverage of vulnerable groups with:

- Artemisinin-based combination therapies;
- Intermittent preventive treatment in pregnancy;
- **Insecticide-treated bed nets (ITNs);**
- **Indoor residual spraying (IRS);**

- Integrated; complement GFATM, WB, et al.
- Strengthen NMCPs; build capacity
- Evidence-based (*investment in M&E*)
- Joint USAID and CDC implementation

### Funds support:

- Commodities (50%)
- Implementation
- Technical Support
- Monitoring and Evaluation
- Applied Research

Year	Funding Level	Coverage
2006	\$30 M	Uganda, Tanzania and Angola
2007	\$135 M	+ Malawi, Mozambique, Senegal and Rwanda
2008-2009 (requested)	\$ 300 M/a	+ Benin, Zambia, Ghana, Kenya, Liberia, Mali, Madagascar, Ethiopia
2010	\$ 500 M	15 Countries
TOTAL	\$1.265 B	15 Countries

*By end of 2007:*

- 10 m people protected by IRS
  - 4.2 m LLINs distributed
  - 15 m treatment courses ACTs
  - 1.5 m IPTp doses
  - 14,000 HW trained
- 
- Support for: pharmaceutical management, diagnosis and case management, IRS, MIP, M&E

*Integrated Vector Management:  
Rationalization and Optimization of vector control,  
alone or in combination*

- Nearly all are LLINs;
  - retreatment campaigns in initial years
- Aim for high-level coverage and use;
  - *Starting* with children and pregnant women
- Multiple approaches to ITN distribution;
  - majority free of charge

## LLINs: comprehensive approach

- Free distribution
  - Campaign
  - Routine distribution (ANC, EPI, <5 clinics)

- Targeted subsidies (incl. vouchers)

- Facilitate commercial sector

- Target areas and insecticide are selected NMCP and PMI
- Environmental Assessment, Pesticide Management
- Entomological Monitoring, Capacity Building
- Procedures Manual

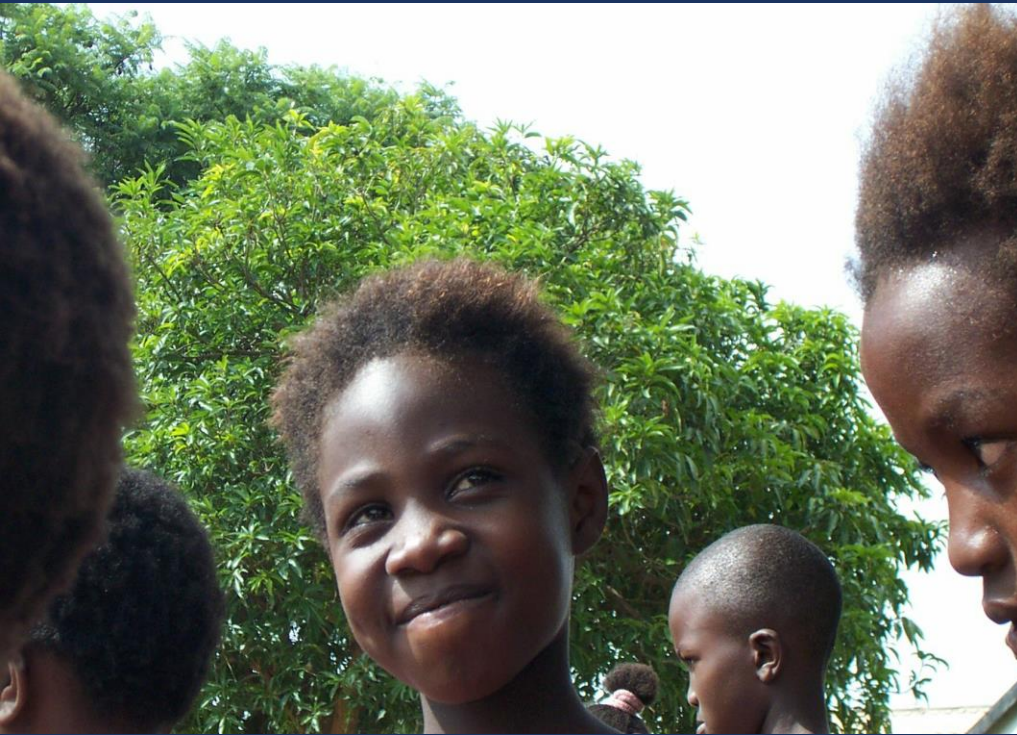

- Currently not supported as a primary vector control strategy
- Support for larval control in Dar es Salaam
- Targeted operational research in Sahel region

PMI

PMI: ambitious goals,  
but vast opportunity and  
great hope for the future.

- IVM: LLINs and IRS
- Pesticide Management
- Entomological capacity building
- Long-term vision
