

Healthy Cities Healthy People

Healthy Cities, Healthy People Workshop and World Café

Global framework for the response to malaria in urban areas

Healthy Cities Healthy People

The Comprehensive Multisectoral Action Framework

Malaria and Sustainable Development

World Health Organization

KEEPING THE VECTOR OUT

Housing improvements for vector control and sustainable development

UN HABITAT FOR A BETTER URBAN FUTURE

World Health Organization

Integrating health in urban and territorial planning:
A sourcebook

Workshop and World Café Objectives

Understand role of city leadership in disease control and identify ways to support and empower city led approaches

Share knowledge and expertise on sectors that have greatest contribution to disease control – beyond the health sector

Identify ways in which communities can be empowered and supported to improve health outcomes

Healthy Cities, Healthy People

Themes

- **Local Government: how it works, responsibilities, constraints**
- **Water, Sanitation, Drainage: What measures are required to improve health?**
- **Housing: How can we improve housing to prevent disease**
- **Waste Disposal**
- **Community Engagement**
- **Local level surveillance and data collection**

Workshop and World Café

Key Questions:

- **What do you think are the main challenges for this theme and how can these be addressed?**
- **What are the challenges between national and local level. Are policies and governance structures aligned?**
- **What do you think are the most important elements that this theme needs to address to enable local-level initiation?**
- **What are the best ways to fund such local-level activities, and do you have examples?**
- **How best do you think good practices could be shared between cities and town both in the same country and with others outside?**
