Unitaid strategy and malaria projects

Mozambique mission
1. Overview - Unitaid strategy 2017-2021
2. Malaria portfolio and investments in IPTp
Unitaid connects the upstream to the downstream

Upstream

- Academia
- Industry
- PDPs
- BMGF
- Grand Challenges
- Others

Projects with grantees

- Innovation & Availability
- Quality
- Affordability
- Supply & Delivery
- Demand & Adoption

Governments & Partners

- Medicines
- Devices
- Systems

Downstream

- HIV/AIDS
- Tuberculosis
- Malaria
- ...
Unitaid’s Strategy 2017-2021

- Approved by EB in Dec 2016
- HIV/AIDS (incl. co-infections), TB & malaria
- More integrated approach to health

Underpinned by:
- Disease narratives
- Thematic narrative RMNCH
- Specific approaches
Unitaid plays a role at 3 critical moments

- **Moment 1**: Product is available
- **Moment 2**: Product is adopted
- **Moment 3**: Product is scaled-up

**Objectives**

- Innovation
- Access
- Scalability

Maximize the effectiveness of the global health response...

... by catalyzing equitable access...

... to better health products
1. Overview - Unitaid strategy 2017-2021
2. Malaria portfolio and investments in IPTp
List of endorsed Areas for Interventions in malaria

1. Accelerate adoption of innovative vector control tools

2. Optimize introduction of tools for the treatment of severe malaria

3. Expand access to preventive chemotherapy in pregnant women

4. Opportunity for a malaria vaccine
November 2015: Call for Proposals

Support adequate supply of quality SP, including adapted packaging

Work with SP manufacturers to meet international quality standards/achieve WHO PQ; expand production capacity; adapt packaging for SP's use in IPTp

Generate evidence for innovative approaches to delivery and demand generation, to support global guidance & scale-up

Develop and test innovative models of IPTp delivery, such as new delivery channels and approaches, private sector engagement, demand generation, and logistics and stock management
### TIPTOP: Transforming IPT for Optimal Pregnancy

IPTp enabling activities – supply side

Improve global supply of quality assured SP for IPTp:

1. Secure WHO PQ or SRA pathways for QA SP
2. Develop adapted drug packaging promoting IPTp-SP
3. Strengthen of SP product demand forecast
4. Conduct landscape analysis to identify a viable sulfadoxine API manufacturer to expand market supply for QA SP
5. Support regulatory approval of a 2nd manufacturer for sulfadoxine API
WHO: IPTp enabling activities

1. **Technical support** to pilot interventions, and documentation of best practices

2. Convene WHO-ERG and review evidence to develop WHO policy recommendations

3. Provide **implementation guidance** and technical assistance to national health authorities and partners in focus countries

4. **Disseminate** policy recommendations, knowledge and lesson learned
Summary: Unitaid’s malaria portfolio

Prevent
- ACCESS SMC
- Next gen IRS
- TIPTOP (IPTp)
- RTS,S
- New VC tools
- LLIN catalytic initiative

Test
- Dx Quality

Severe malaria treatment
- Refer
- Treat

Childhood fever mgmt

Cross-cutting
- MMV supply, WHO enabler, WHO PQ

Current portfolio
- In progress
- Potential new AFI
