Elimination Interest Group (EIG)

Purpose

- Facilitates and promotes the **exchange** of strategies, approaches, and lessons learned for malaria elimination at the global level.
- Provides a **forum** where malaria endemic countries (particularly those actively planning or in the early implementation phase of national and/or subnational elimination efforts), bilateral and multilateral development partners, the private sector, non-governmental and community-based organizations, philanthropic foundations and research and academic institutions can **come together to learn from each other and coordinate efforts** to work towards *A World without Malaria*.
- **Not a technical body**, nor does it offer technical advice or support program implementation; exchanges through EIG forums allow for member programs and partners to share experiences in interpretation and operationalization of normative guidance.
- The EIG's work **builds on and helps to disseminate and reinforce the operationalization of WHO guidelines on malaria elimination and complement their Elimination 2025 initiative, which focuses on countries in the last mile.**

EIG development and launch

- **Phase One** (June 2022) convened interested parties to discuss whether an EIG could assist countries in moving towards elimination, brainstorm on the objectives and functions of such a group. Draft TORs were developed following the meeting.
- **Phase Two** (ASTMH 2022) convened a forum with NMCPs of the malaria-endemic countries where PMI is supporting malaria elimination activities to solicit input on the draft TORs.
- **Virtual Launch** (October 3, 2023) convened to launch the EIG, share experiences on stratification, and nominate co-chairs.
- **In-Person Kick-Off** (October 18, 2023) convened to share experiences on case detection and response and elimination models (e.g. 1-3-7) and identify 2024 workplan priorities

EIG leadership and coordination

- Elected co-chairs: Dr Baltazar Candrinho, NMCP Director, Mozambique, and Allison Tatarsky, Director, UCSF Malaria Elimination Initiative
- Planning committee: PMI REACH/PATH (Secretariat), PMI (USAID and CDC), Global Fund, WHO GMP, BMGF
- EIG membership: NMPs and technical partners (>125 members to date)
- Workplan developed collaboratively by EIG membership who also led/contribute to workplan activities

2024 workplan

- Activity 1: Track and elevate meeting action items
- Activity 2: Convene knowledge exchange based on priority topics, for example:
 - *P. vivax* accelerator strategies
 - Managing control vs elimination areas
- Activity 3: Establish and manage an online resource exchange
- Activity 4: Host an interactive webinar on the updated WHO Framework on Malaria Elimination
- Activity 5: Advance discussions about incorporation as an RBM working group

Themes of interest to EIG membership

Surveillance	Stratification	Active and reactive approaches	Advocacy and resource mobilization
Community engagement	Program management	Elimination indicators	Non falciparum malaria
Cross-border efforts	Last mile interventions	Private sector financing	Diagnostics

Cross-fertilization with RBM working groups

- Identify synergies with other working groups (e.g. VCWG, MSWG, SMEWG)
- Coordinate to avoid duplication and maximize impact and opportunity
- Bring together technical areas and tackle problems/questions holistically
 - I.e. fill the gap as a cross-cutting working group
- Cross-fertilize ideas, outputs, and advocacy efforts

Thank you!

PMI
