ALMA actively advocates for malaria to remain high on the development and resource mobilisation agenda (1/2)

H.E. President Umaro Sissoco Embaló wrote to the Heads of State and Government of HBHI countries urging them to establish End Malaria Councils and Funds and explore opportunities to use IDA funding to fill key gaps in malaria programming.

At the ECOWAS Heads of State meeting in July, and the UNGA H.E. President Embaló emphasised the importance of keeping malaria high on the agenda.

H.E. President Umaro Sissoco Embaló wrote to the President of the World Bank urging for an enabling environment for financing health and malaria.

ALMA ES met with the World Bank President and VP HD to advocate for malaria to be prioritised for IDA funding with follow up meetings with the Africa regional director.

ALMA and AUC Joint WHA event on malaria and NTDs co-hosted with the African Union Commission and attended by Ministers of Health.

SADC/RBM/ALMA/WHO Regional committee meeting with Ministers of Health of Africa on the urgency of addressing the current malaria situation.

Joint ALMA and RBM partnership Malaria Financing Emergency meeting held at the UNGA with a call to action.
ALMA actively advocates for malaria to remain high on the development and resource mobilisation agenda (2/2)

On World Malaria Day, ALMA rolled out a digital story-telling campaign – “My Zero Malaria Story” to showcase the efforts of every-day Africans in contributing to the fight against malaria.

ALMA published supplements targeting West Africa, East Africa and Southern Africa to showcase the progress made by AU member states in fighting malaria.

Against the backdrop of the T20 high-level meeting (an official Engagement Group of the G20), ALMA’s Special Ambassadors collaborated with the APLMA to co-author a call for a holistic approach for malaria elimination.

ALMA (in partnership with the AU and RBM Partnership to End Malaria) authors the annual AU Malaria Progress Report. This report is introduced into the formal agenda of the AU Summit by ALMA’s Chair.

Malaria Story-telling

ALMA (in partnership with the AU and RBM Partnership to End Malaria) authors the annual AU Malaria Progress Report. This report is introduced into the formal agenda of the AU Summit by ALMA’s Chair.
ALMA’s priority Agenda

Digitalisation
Improve access to malaria data through a digital platform and by using country scorecards so that all citizens are aware and empowered to act.

End Malaria (and NTD) Councils & Funds
Establish End Malaria Councils & Funds to mobilise additional domestic public and private resources and engage country leaders.

Regional Coordination
Work with Africa’s Regional Economic Communities and Heads of State and Government to drive progress at the regional level.

Youth Corps
Create an ALMA youth Corps for malaria, NTD and UHC advocates to champion political and resource commitments.

Malaria as a pathfinder for key elements of Pandemic Preparedness
ALMA Scorecard for Accountability & Action

The ALMA Scorecard and Country Reports (incl. recommended actions) are disseminated quarterly to:

- Head of State and Government
- Ministers of Health, Finance and Foreign Affairs
- Ambassadors to the AU and UN

Country-specific recommended actions have a >90% response rate

We are planning to add new indicators:
- Malaria co-financing Q1
- New CHW data (from UNICEF, funded by BMGF)
ALMA has supported countries in the implementation of 41 malaria, 31 RMNCAH, 18 NTD, 4 nutrition, and 6 community scorecards for accountability and action.

Country scorecard management tools are country-owned tools used to:

- track national and sub-national real time health data against priority indicators aligned to national plans
- identify bottlenecks or gaps
- increase accountability
- enhance decision-making to drive action

They are integrated into existing accountability and management processes

Drive action including addressing upsurges, stock-outs, task-shifting, filling resource gaps etc

Used at National, Sub-national and even community levels (quality of care) and at both technical and political levels
ALMA’s Scorecard Hub enables sharing of scorecards, best practices, and toolkits amongst a growing community of practice.

15 countries sharing scorecards on the Scorecard Hub

61 best practices covering case studies from 15 countries*

- **Malaria:** 14 countries sharing scorecards
  - Angola, Burkina Faso, Burundi, DR Congo, Eswatini, Ghana, Guinea, Guinea-Bissau, Kenya, Mozambique, Rwanda, Tanzania, Togo, Zambia

- **RMNCAH:** 9 countries sharing scorecards
  - Burundi, DR Congo, Ghana, Kenya, Mali, Rwanda, Sierra Leone, Tanzania, Zambia

- **NTDs:** 9 countries sharing scorecards
  - Burkina Faso, Burundi, Congo Republic, Guinea, Malawi, Rwanda, Senegal, The Gambia, Zambia

- **Nutrition:** 2 countries sharing scorecards
  - Burkina Faso, Kenya

- **Community:** 1 country sharing scorecards
  - Ghana

- **Malaria:** 18 best practices
  - Burkina Faso, Eswatini, Guinea, Kenya, Mozambique, Rwanda, Tanzania, Zambia

- **RMNCAH:** 25 best practices
  - Burundi, Ethiopia, Kenya, Mali, Nigeria, Rwanda, Uganda, Zambia

- **NTDs:** 10 best practices
  - Congo Republic, Mali, Rwanda

- **Nutrition:** 1 best practice
  - Kenya, Tanzania

- **Community:** 8 best practices
  - Ethiopia, Ghana

21,700 visitors visited the Scorecard Hub during H1 2023

1,098 people have attended webinars

3,230 certificates have been issued

▲ 64% higher than first 6 months 2022 – 13,200 visitors

▲ 167 people @ awards webinar in February 2023

▲ 507 new certificates in 2023

End Malaria & NTDs Councils and Funds convene senior leaders from across sectors and key segments (e.g., youth, women) to mobilise advocacy, action and resources.

**Head of State & Government**
- Appoints

**End Malaria & NTD Council / Fund**

**Public sector**
- Ministers, Principal Secretaries, Parliamentarians, Governor of National Bank, Head of Revenue Authority, Municipal Leaders

**Private sector**
- CEO of Influential Businesses, President of Trade Organisations

**Community**
- Religious Clergy, Traditional Leaders, Civil Society, Rotarians

**Malaria & NTDs Programmes**
- Develop and implement the national strategic plans and identifies bottlenecks and resource gaps

**Administrative Secretariat**
- 2-3 person secretariat that organises quarterly meetings and documents / tracks commitments from the various sectors

8 councils & funds now operational: Guinea-Bissau (launched in May), Tanzania (launched in April), Kenya, Eswatini, Zambia, Mozambique, Uganda and Nigeria
4 additional expected to launch by end of 2023
16 more under development
Tanzania launched its End Malaria Council on World Malaria Day – sectors actively working to mobilise commitments

The Prime Minister of Tanzania launched the EMC on World Malaria Day along with the Hon. Minister of Health and the other EMC members. The EMC is chaired by the Managing Director of the Confederation of Tanzania Industries and is composed of senior leaders from all sectors.

The EMC’s Chair and Hon. Minister of Health met with senior executives from SC Johnson to sign a pledge to contribute $2 million USD to support the fight against malaria. The funding will be managed and distributed by the End Malaria Council.

The EMC members held a workshop in June to receive a detailed briefing on the malaria situation and collaboratively discuss what each sector will contribute. The meeting was promoted on social media by the Ministry of Health.
ALMA’s Malaria Youth Corps mobilises young leaders across the continent to advocate and take action to end malaria

**Youth Advisory Council**
- ALMA established a Continental Youth Advisory Council to provide strategic guidance to National Youth Army activities
- 11 young leaders from Africa and a representative of the diaspora

**National Malaria Youth CORPS**
- Country-level network of youth in existing leadership positions across sectors
- Mobilize the use of digital advocacy tools and solutions for malaria elimination and the expansion of Universal Health Coverage
- Integrate youth led efforts to strengthen the country scorecard mechanisms

**Malaria Youth Champions**
- ALMA received interest from more than 3,000 young leaders across 45 African countries.
- Promote accountability and action, innovation, research and development within existing, country-level structures

A call to action on financing

1. Launch high-level, multisectoral national End Malaria & NTD Councils and Funds to maintain malaria high on the national development and resource mobilisation agenda, increase public and private sector domestic funding, and increase the allocation of domestic budgets to health and malaria.

2. Prioritise health and malaria financing in the country allocations of World Bank International Development Association (IDA) funding and the use of debt swaps.

3. The World Bank to commit to a new Malaria Booster Programme to facilitate the additional financing needed to close the immediate gaps (with additional commitments from regional development banks).

IV. Advocate for increased International financing from traditional donors and the identification of new donors.

V. Ensure that the malaria fight is fully financed, including through integrated approaches with malaria as a pathfinder for health systems strengthening, pandemic preparedness, climate change, and health mitigation and adaptation.
Conclusions & recommendations

1. We encourage countries to further institutionalise national and subnational malaria scorecards and to publish them on the ALMA Scorecard Hub and in other forums to drive multisectoral accountability and action.

2. We are excited about the Youth response across the continent and look forward to working with countries on Malaria Youth Corps.

3. End Malaria Councils & Funds continue to gain momentum and we look forward to the upcoming launches and are ready to support any interested countries.

4. We look forward to increased cross-border coordination and collaboration, including through the Regional Economic Communities.

5. Supply chain bottlenecks continue to be a challenge for global health commodities and we encourage the region to prioritise local manufacturing of malaria commodities to improve resilience.
Thank You
