

COUNTRY TECHNICAL ASSISTANCE (TA) PLAN FOR 2019

Background

RBM Partnership to End Malaria, through its Country/Regional Support Partner Committee (CRSPC), coordinates and convenes the efforts of its members to provide technical assistance (TA) to countries.

For 2019, the National Malaria Control Programme Managers identified and expressed their TA needs during and after the CRSPC sub-regional coordination meetings. The country TA plan for 2019 was compiled as shown in the tables below for the countries in Eastern and Southern, and Western and Central Africa, respectively. The TA mechanism is open to all malaria-endemic countries, and National Malaria Control Programme Managers can still inform on their TA needs as they evolve over time.

The RBM/CRSPC coordinated technical support mechanism first seeks to ensure that all avenues to meet the request are first sought from in-country mechanisms and partners, followed by a sub-regional or regional source for support, before escalating the request to a global level, where necessary. Countries should first exhaust the potential of different partners who are working in the country or in the region to request technical support.

Technical Assistance (TA) modalities extend to the following areas:

- resource mobilization and advocacy;
- implementation support (including LLINs distribution campaigns, implementation bottleneck resolution, establishment of effective surveillance systems);
- programme reviews and National Strategic Plan development.

Please note the following:

- ❖ a detailed explanation of the application process can be found [here](#).
- ❖ the [Request Form](#) needs to be duly completed and submitted to the Focal Point(s) indicated in the application process form mentioned above. The form is available for download in English and French.

PLAN D'ASSISTANCE TECHNIQUE (TA) AUX PAYS POUR 2019

Contexte

Le Partenariat RBM pour en finir avec le paludisme, par l'intermédiaire de son Comité de partenaires de soutien aux pays / régions (CRSPC), coordonne et rassemble les efforts de ses membres pour fournir de l'assistance technique (TA) aux pays.

Pour 2019, les gestionnaires des programmes nationaux de lutte antipaludique ont identifié et exprimé leurs besoins d'assistance technique pendant et après les réunions sous-régionales de coordination. Le plan TA pour 2019 a été élaboré comme indiqué dans les tableaux ci-dessous, pour les pays d'Afrique orientale et australe, d'un côté, et occidentale et centrale, de l'autre. Le mécanisme TA est ouvert à tous les pays touchés par le paludisme et les responsables des programmes nationaux de lutte antipaludique peuvent toujours communiquer leurs besoins d'assistance technique à mesure qu'ils évoluent.

Le mécanisme d'appui technique coordonné par RBM/CRSPC cherche premièrement à s'assurer que tous les moyens de répondre à une demande sont d'abord recherchés auprès des mécanismes et des partenaires dans le pays, suivis d'une source d'assistance sous-régionale ou régionale, avant de porter la demande au niveau mondial, si le besoin persiste. Les pays doivent d'abord épuiser le potentiel des différents partenaires qui travaillent dans le pays ou dans la région.

Les modalités TA s'étendent aux domaines suivants :

- mobilisation des ressources et plaidoyer ;
- soutien à la mise en œuvre (y compris campagnes de distribution de moustiquaires, résolution des difficultés d'implémentation, mise en place de systèmes de surveillance efficaces ;
- évaluation des programmes et élaboration des plans stratégiques nationaux.

Veuillez noter les points suivants :

- ❖ une explication détaillée du processus de candidature peut être trouvée [ici](#).
- ❖ le [formulaire de demande](#) doit être dûment complété et soumis aux points de contact indiqués dans le formulaire de candidature mentionné ci-dessus. Le formulaire est disponible au téléchargement en anglais et en français.

CRSPC 2019 TA Plan for Eastern and Southern Africa Sub-Regions
