WHAT is SP&DQ Committee?

SP&DQ stands for "Surveillance Practice and Data Quality".

This committee is dedicated to document and coordinate malaria surveillance and data quality strengthening efforts.

WHY established?

This committee was set up following recommendations from the 31st SMERG* meeting [23-25 September 2020].

SMERG SP&DQ Committee is established to improve the visibility of surveillance and data quality improvement initiatives and to streamline global coordination of surveillance-related efforts.

SMERG: Surveillance, Monitoring and Evaluation Reference Group

WHERE reports to?

SP&DQ Committee seats under and reports to RBM SMERG.

SMERG Co-chairs are the final decision makers for establishment, continuity or dissolution of the committee.

WHEN established?

The committee and its objectives presented by SMERG Co-chairs on 27th January 2021

The ToR finalized and published in April 2021.

The first official meeting realized on 6th May 2021.

The committee has 3 years investment till January 2024.

WHO is involved?

SMERG Co-chairs: Médoune Ndiop Molly Robertson

SP&DQ Co-leads: Arantxa Roca-Feltrer Baltazar Candrinho

Coordination and Governance: Malaria Consortium & SMERG Secretariat

Members: 34 from 5 continents, 18 countries, 22 organization, 5 NMCPs

Membership is an open process, any volunteers are welcomed.

HOW operates?

The committee is led by two "co-leads". At least one of them must be NMCP representative.

Whilst the co-leads give Strategic and technical direction of the Committee, they also ensure alignment with SMERG secretariat and review quarterly updates and annual reports.

Monthly virtual meetings will be prepared and led by coleads with the alignment of SMERG Co-chairs.

All minutes, decisions, and key documents to be published on the SMERG website.

Overall Objectives

Disseminate information on implementing partners' current use of surveillance operational tools and improve implementation and partner coordination relating to their use and uptake.

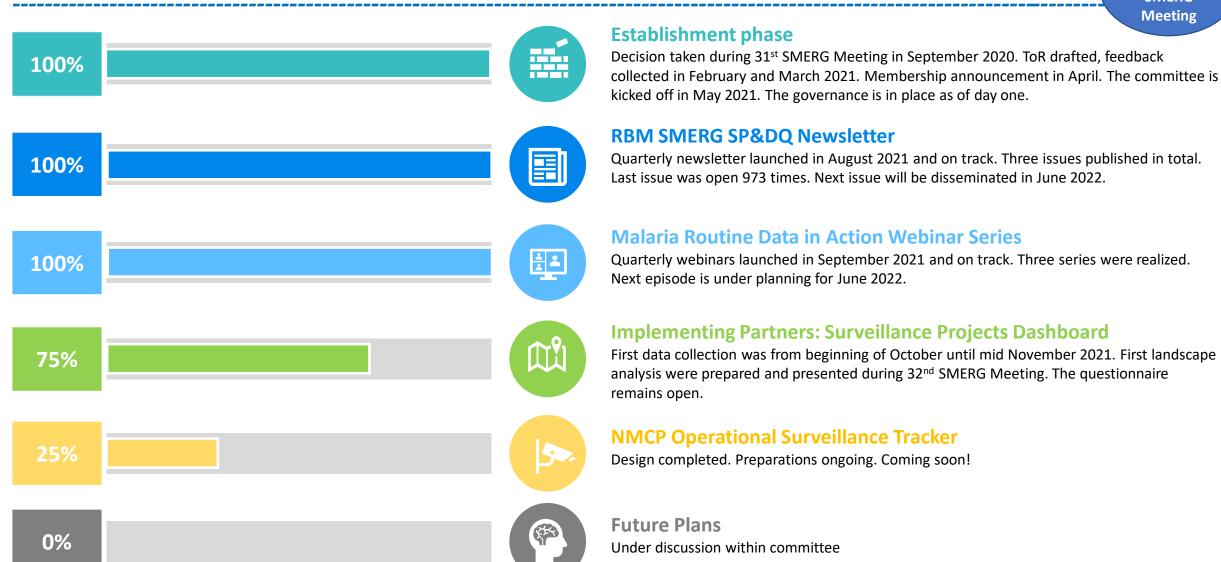

Dynamically track surveillance initiatives and the implementation of related tools and practices.

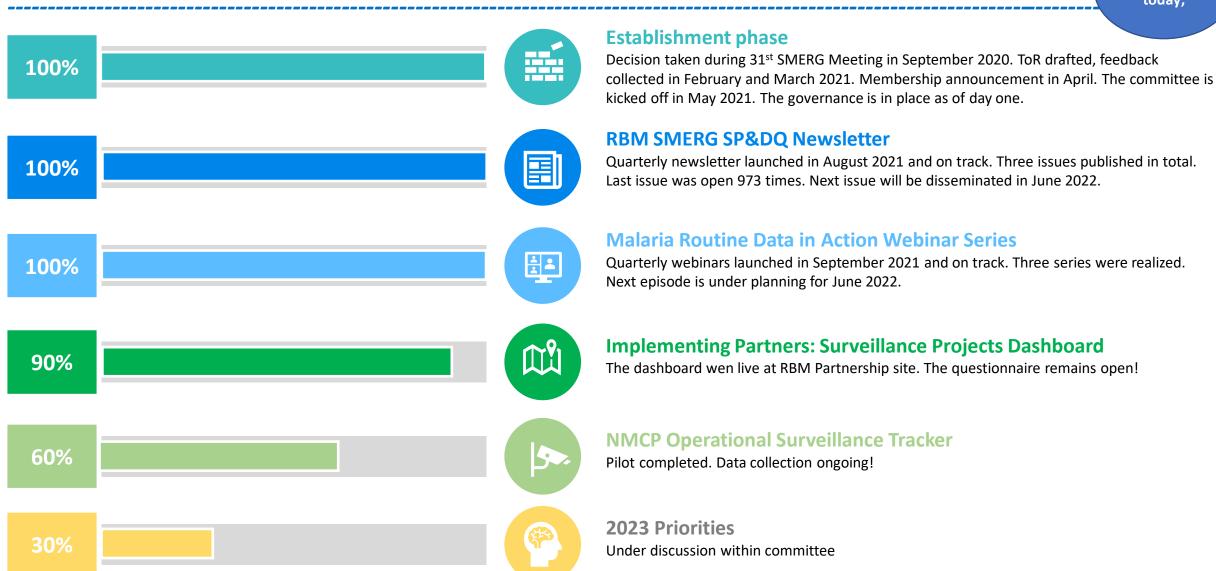

Document the advantages and disadvantages of surveillance and data quality tools and activities, as well as the lessons learnt from their implementation.

Identify the operational surveillance priorities of national malaria control programs (NMCPs) to further support the uptake and adaptation of tools.

Background

- Establishing systematic tracking mechanism was one of the main components and very first actions of the SP&DQ Committee. To be able to achieve this target, there was a need to realize a landscape mapping to identify who is doing what and develop an operational surveillance framework to track current surveillance efforts.
- SMERG SP&DQ Committee built Implementing Partners questionnaire via Kobo Toolbox to be able to map out surveillance and/or data quality related efforts globally.

Implementing Partners Questionnaire

RBM SMERG Surveillance Practice & Data Quality Committee: Systematic tracker | Implementing partners questionnaire

Introduction note for respondents

This survey is prepared by the RBM Surveillance, Monitoring and Evaluation Reference Group (SMERG)'s Surveillance Practice and Data Quality (SP&DQ) Committee. The Committee is established to improve the visibility of surveillance and data quality improvement initiatives and to streamline global coordination of surveillance-related efforts. As part of these efforts, the Committee aims to establish a tracking mechanism for implementing partners' initiatives/projects and NMCPs' surveillance operations framework. Information from initiatives/projects implemented by partners will be collected through this survey. Please fill in these survey for each relevant project. For each project, 20 short questions need to be answered. In the coming months the goal is to make the findings available through the RBM SMERG website allowing donors, partners and national programmes to learn about existing surveillance and data quality projects, lessons learnt and best practices Please ensure that your project(s) information is added to this platform by 31st October 2021. Thank you for participating in this new and exciting initiative! SMERG SP&DQ Committee

Q1: Project title

Q2: Which country/countries is the project implemented in?

Multiple choices possible

Q3: Please upload the project brief if available and open to public

Click here to upload file. (< 5MB)

Q4: Please add the link to the project website if available and open to public

Implementing Partners Questionnaire

4: Please add the link to the project website if available and open to public
5: Does your project focus on surveillance and data quality?
project does not focus on surveillance and data quality at all, please do not fill in this questionnaire
Yes, primary focus
Yes, includes some components on surveillance and data quality
Q6: Organization name
Q7: Project manager/ focal point name
This information will not be shared publicly
Q8: Email address of project manager/ focal point
This information will not be shared publicly
Q9: What are the objective(s) or component(s) of the project related to surveillance and data quality?
Q10: Start date of project Q11: Expected end date of project
Q12: Please choose all components that the project addresses related to surveillance and data quality - You will be asked to list related activities later on
Multiple choices possible What activities does the project implement related to "Case surveillance - Capacity building"

Implementing Partners Questionnaire

Q13: Please list any collaborator(s) supporting the surveillance and data quality component

Collaborator 1

For example: NMCP, universities, other global/ local organizations, ... Leave empty if there are no collaborators

Q14: Administrative levels

At which level do you implement the project?

Multiple choices possible

Q15: Sectors

Which sector of the health system is the project addressing?

Multiple choices possible

Q16: Service level

At which level of service does this project operate?

Multiple choices possible

Q17: Donors

Which donor is funding the project?

Multiple choices possible

Q18: What is the total budget (USD) of the project?

Not mandatory

Q19: Are there any findings, best practices, and lessons learnt that you can share?

File 1

For example: publications, presentations, abstracts etc.

Q20: Are there any upcoming important events that you would like to highlight?

SMERG SP&DQ Committee Progress on IPSP Dashboard

90%

Implementing Partners: Surveillance Projects Dashboard

Second year data collection completed in November 2022 and the dashboard updated accordingly!

Questionnaire built and reviewed by the committee members in August-September period

APMEN Secretariat supported the initiative's dissemination by reaching out 9 of their members across their geography.

An **interim dashboard** was built and shared with the committee members.

Decision taken as to simplify the dashboard before opening to public.

Second year data collection completed, and the dashboard updated

August 2021

March 2022

November 2022

Maintenance

SMERG Secretariat disseminated the questionnaire across all SP&DQ Committee members on 16th October 2021. The secretariat made follow up and reminders twice including the deadline extension until 15th November.

First landscape analysis prepared about who is doing, what and where in the scope of surveillance and data quality. The results presented during 32nd SMERG Meeting in November.

The simplified dashboard went live at RBM site on 9th March.

IPSP Dashboard year one vs year two

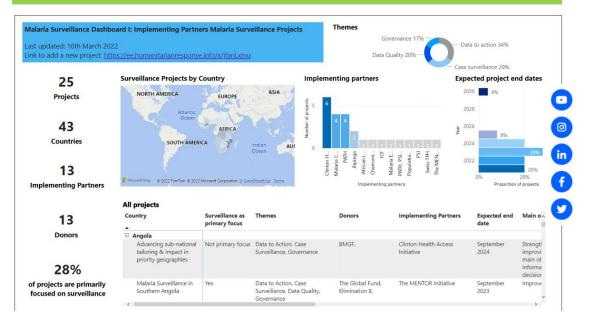

90%

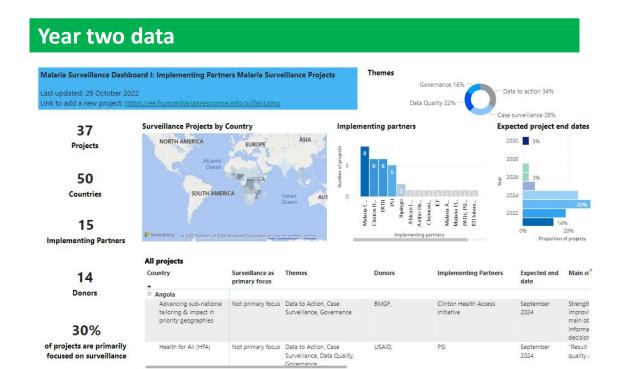

Implementing Partners: Surveillance Projects Dashboard

Second year data collection completed in November 2022 and the dashboard updated accordingly!

Year one data

- The number of projects submitted was increased from 25 to 37.
- Whilst 43 countries were covered by 25 projects submitted in first year, 50 countries were covered thanks to addition of the new projects.
- First year 28% of the projects' primary focus was surveillance, second year 30% of the projects.
- Two new implementing partners supported the initiative by submitting their projects.
- One more donor was mentioned in the second-year data collection.

Implementing Partners Surveillance Projects Tracker and Dashboard

30%

of projects are primarily

focused on surveillance

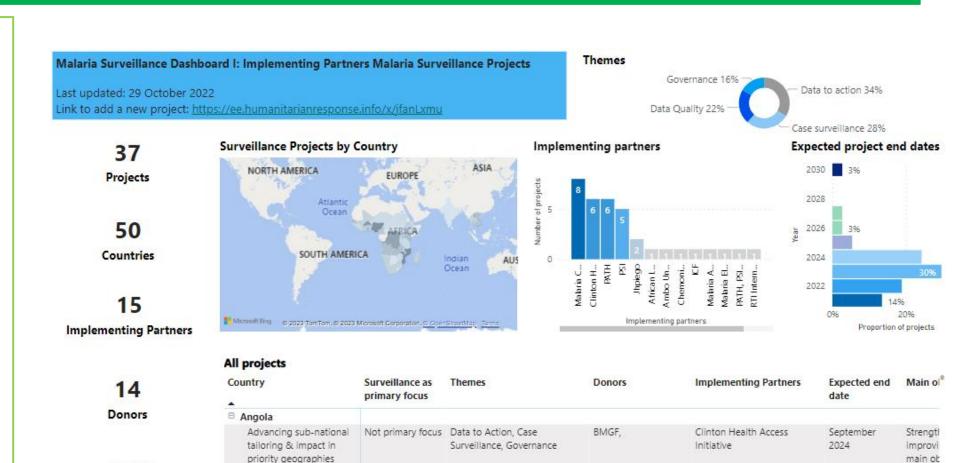

Health for All (HFA)

Year two data:

Second year:

- The data collection link was re-circulated by SMERG Secretariat in September.
- As of 26th October, the number of projects submitted reached to 37.
- As always, the data collection link remains open, please do not hesitate to add your new projects:

Themes:

Theme	Occurence of theme
Data to action	35
Case surveillance	29
Data Quality	23
Governance	17

- Most projects focus Data to Action (34%) and Case Surveillance (28%) activities.
- Whilst 35 activities were linked to Data to Action theme, 29 activities were linked to the case surveillance.
- Data quality was ranked as the third theme with 23 activities linked.
- Governance is the theme which has less activities (17 in total) comparing to the other themes.

Feedback

First year, the SP&DQ Committee reached out 35 implementing partners whilst only **10** of them submitted projects for the first landscape analysis. The number of implementing partners increased to **13** and then **15** in time. Although there is progress in the number of implementing partners, there is an obvious need to engage others.

Development Area

Reaching to more implementing partners who are not represented in SMERG SP&DQ Committee is important. Before sending the next generation of the questionnaire later in 2023, expanding the network is key. Any ideas to engage more partners are most welcome!

Thanks, and reminder:

Implementing Partners: Surveillance Projects Dashboard

Second year data collection completed in November 2022 and the dashboard updated accordingly!

Keep using it!

RBM SMERG Surveillance Practice & Data Quality Committee: Systematic tracker | Implementing partners questionnaire (humanitarianresponse.info)

- Please remember the questionnaire is kept open anytime.
- You may add your new projects anytime

OR

 You can share it with the implementing partners whose projects are not yet in the dashboard

Agenda:

Introduction (10 mins) • Speakers: Dr Arantxa Roca-Feltrer • Objective: SP&DQ Committee: scope, objectives, initiatives and achievements Implementing Partners Surveillance Projects Dashboard (20 mins) • Speakers: Dr Arantxa Roca-Feltrer • Objective: Executive summary of second year Contribution to 2023 priorities (15 mins) • Speaker: Hannah Edwards • Objective: Collect who can contribute on what NMCPs Surveillance Operational Milestones Tracker (60 mins) • Speaker: Hannah Edwards & Julianna Smith • Objective: Reflections on data submitted and the

South-south surveillance practice exchange across countries

• Status: The aim is to realize the exchange visit to Cambodia and/or Thailand with Africa NMCPs.

Document lessons learned and best practices from entomological surveillance integration

• Status: Specific webinar held on 29th March 2023. There are also discussions ongoing with RBM VCWG to determine follow-up.

Understand uptake and use of IP Projects Dashboard and NMCP Operational Surveillance Milestones Dashboard.

- Conduct qualitative interviews with key stakeholders to understand uptake and use of Implementing Partners Surveillance Projects Dashboard and NMCP Operational Surveillance Milestones Dashboard.
- Status: To be realized after completing the data collection of NMCP tracker.

Cross-border surveillance experiences

- Cross-border surveillance experiences documentation to identify best practices and incentives/disincentives for CB collaboration; findings shared publicly (consultancy or staff time for desk review/qualitative interviews with key stakeholders).
- Status: A specific webinar will be organized under Médoune's leadership with WHO.

RBM SMERG SP&DQ Committee 2023 Priorities: Who can contribute what?

1. Please write your name and describe how you can support, if you would like to contribute/participate:

"South-south surveillance practice exchange across countries"? Status: The plan is to realize the exchange visit to Cambodia and/or Thailand in Q3 2023 with Africa NMCPs.

Enter your answer

2. What should south-south exchange visit include? (ex: elimination, cross-border collaboration, data quality..etc)

3. Please write your name and describe how you can support, if you would like to contribute:

"Document lessons learned and best practices from entomological surveillance integration". Status: A specific webinar held on 29th March 2023. We are open to any additional suggestions.

Plans for priorities:

4. Please write your name and describe how you can support, if you would like to contribute/participate:

"Understand uptake and use of IP Projects Dashboard and NMCP Operational Surveillance Milestones Dashboard." Conduct qualitative interviews with key stakeholders to understand uptake and use of Implementing Partners Surveillance Projects Dashboard and NMCP Operational Surveillance Milestones Dashboard.

•Status: To be realized after completing the data collection of NMCP tracker.

Plans for priorities:

5. Please write your name and describe how you can support, if you would like to contribute/participate:

"Cross-border surveillance experiences".

Cross-border surveillance experiences documentation to identify best practices and incentives/disincentives for CB collaboration; findings shared publicly (consultancy or staff time for desk review/qualitative interviews with key stakeholders).

•Status: A specific webinar will be organized under Médoune's leadership with WHO. We are open to any additional suggestions.

6. Do you have any suggestions for webinar topics and suggestions for priority workstreams?

NMCP Operational Surveillance Tracker

60%

NMCP Operational Surveillance Tracker

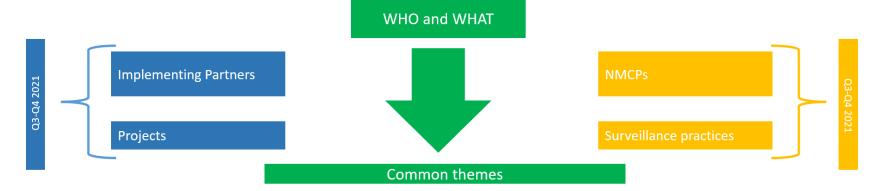

Design completed. Preparations ongoing. Coming soon!

A platform for systematic SP&DQ tracking

Background:

This new initiative is designed to:

"Identify the operational surveillance priorities of national malaria control programs (NMCPs) to further support the uptake and adaptation of tools."

Themes

Case Surveillance Data Quality Data to action Governance

Case surveillance

Capacity building Case detection Reporting frequency Resolution of reported data Reporting & Data mgt Tool development

Data Quality

Capacity building Tool development Training

Data to action

Capacity building Data analysis and modelling Data visualization Malaria Repository (system) Outbreak and warning system Planning and operations (data use) Quality assurance Stock outs of commodities Tool development Stratification and targeting

Governance

Capacity building Coordination Human Resources Structure Operational meetings Policy Tool development Training and supervision

NMCP Operational Surveillance Tracker Next Steps

60%

NMCP Operational Surveillance Tracker

Pilot completed. Data collection ongoing!

The task force mapped out a comprehensive list of surveillance and data quality elements/ milestones of surveillance systems to potentially be tracked at country level

The SP&DQ Committee needs to provide feedback to prioritize 20 questions from the list The task force will rework on the prioritized questions

Alignment with WHO

Meeting with NMCPs during SMERG Conference Platform investigation for data collection

Data collection started

Data collection ongoing until 30th June

Preparing first analysis, discussing data visualization options

Integration with RBM Dashboards

To finalise the long list of milestones/indicators and prioritise the top 20 ones to monitor NMCP Operational surveillance milestones

RBM SMERG Surveillance Practice & Data Quality Committee: Systematic tracker | National malaria control programme questionnaire V2 (humanitarianresponse.info)

RBM SMERG Surveillance Practice & Data Quality Committee: Systematic tracker | National malaria control programme questionnaire V2

Section 1: Introduction

This survey is prepared by the RBM Surveillance, Monitoring and Evaluation Reference Group (SMERG)'s Surveillance Practice and Data Quality (SP&DQ) Committee. The Committee was established to improve the visibility of surveillance and data quality improvement initiatives and to streamline global coordination of surveillance-related efforts. As part of these efforts, the Committee established a tracking mechanism for implementing partners' initiatives/projects Global Malaria Dashboard (endmalaria.org) and aims to track NMCPs' surveillance operational milestones using a similar framework. This is in line with the Committee's terms of reference and is designed to support the operationalisation of WHO's Surveillance Assessment Toolkit.

This survey invites NMCPs to provide an overview of their malaria surveillance operations. It should be completed by the respective NMCP Director, or a nominee of their choosing with thorough knowledge of the malaria surveillance system utilised in-country. In the coming months the goal is to make the findings available through the RBM SMERG website thereby allowing donors, partners and national programmes to learn about existing surveillance systems, including their strengths and challenges, and highlighting areas for cross-learning and development potential. The aim is to facilitate annual updates of submitted data to track progress over time.

Please ensure that the survey is completed by 30th June 2023. Any questions, please contact Hannah Edwards (h.edwards.32@malariaconsortium.org) or Julianna Smith (j.smith.52@malariaconsortium.org)

Thank you for participating in this new and exciting initiative!

SMERG SP&DQ Committee

Q1: Country name?

Q2: Contact person/focal point name?

Q3: Contact person's email address?

▼ Section 2: Context and infrastructure

Q4: How many admin levels you have in your country? (If these admin levels do not apply in your country, please use NA# options as available)	*
Admin 1 (e.g.: Province, state)	
Admin 2 (e.g.: District, LGA)	
Admin 3 (e.g.: Ward)	
Health facility	
Other	
This field is required	

▼ » Section 2.1: Information Systems

Q5: Does the country have any electronic information system(s) into which the following malaria da	ata types are routinely reported?
Q5.1: Malaria routine case data Yes No NA# Q5.1.1: What platform is used?	*
Q5.1.2: Is this data integrated into the broader national HMIS? Yes No NA#	Q5.2: Entomological surveillance Yes No NA# Q5.3: Vector Control (i.e. bed net distribution, IRS) Yes No NA# Q5.4: Diagnostic and treatment commodities Yes No
	Please add any other general comments for any electronic information system(s) into which malaria data are routinely reported

Q6: Are malaria case data available disaggregated by?
Q6.1: Age
○ Yes
○ No
Q6.2: Sex
○ Yes
○ No
Q6.3: Are data in the information system disaggregated to health facility level?
○ Yes
○ No
Q6.4: Is there a georeferenced master list of operating HFs?
○ Yes
○ No
Q6.5: Do community health workers (CHWs) test and treat malaria cases in the community?
○ Yes
○ No

Q7: Does the private sector test & treat or refer suspected malaria cases?
Q7.1: Private hospitals
○ Test and Treat
Refer
○ NA#
Other
Please add any other general comments on private hospitals
Q7.2: Private pharmacies/drug shops
○ Test and Treat
Refer
○ NA#
Other
Please add any other general comments on private pharmacies/drug shops
Q7.3: Informal practitioners/vendors
○ Test and Treat
Refer
○ NA#
Other
Please add any other general comments on informal practitioners/vendors
Q7.4: What proportion of the private sector is reporting?

Q8: Does the malaria information system have dashboards with automatic data visualizations?	*
○ Yes	
○ No	
Q8.3: What dashboard(s) or automatic visualizations are you currently missing that you think would be a benefit?	*
Q9: Does the malaria information system disseminate regular bulletins?	*
○ Yes	
○ No	

▼ Section 3: Surveillance guidelines & SOPs

Q10: Are national guidelines/manuals available for malaria surveillance, and monitoring and evaluation?
Yes
○ No
Q10.1: Do guidelines include specific tools/approaches for tracking/ assessing data quality?
○ Yes
○ No
Q10.2: Do the guidelines take into account approaches for different endemicities (e.g. high transmission, to low transmission)
○ Yes
○ No
Q10.3: When were the guidelines last updated?
Q10.4: When was the last time staff received training on the guidelines?
Q10.4.1: National staff
Q11: Does your country have regions considered "low transmission or pre-elimination"?
Yes
○ No
Q11.1: Do surveillance, monitoring and evaluation guidelines take this into account with specific approaches low transmission settings?
○ Yes
○ No

Q12: Is there a functional surveillance, monitoring and evaluation working group at central level?	
Yes	
○ No	
212.1: Did they meet last three months	
○ Yes	
○ No	

» Section 4.3: Surveillance staff proficiency

Q15: Do you have training in place for malaria surveillance and data quality? Please answer for each admin level
Q15.a: National
○ Yes
○ No
○ NA#
Q15.f: Community level
○ Yes
○ No
○ NA#
Q16: What are the main gaps in training needs at each level?

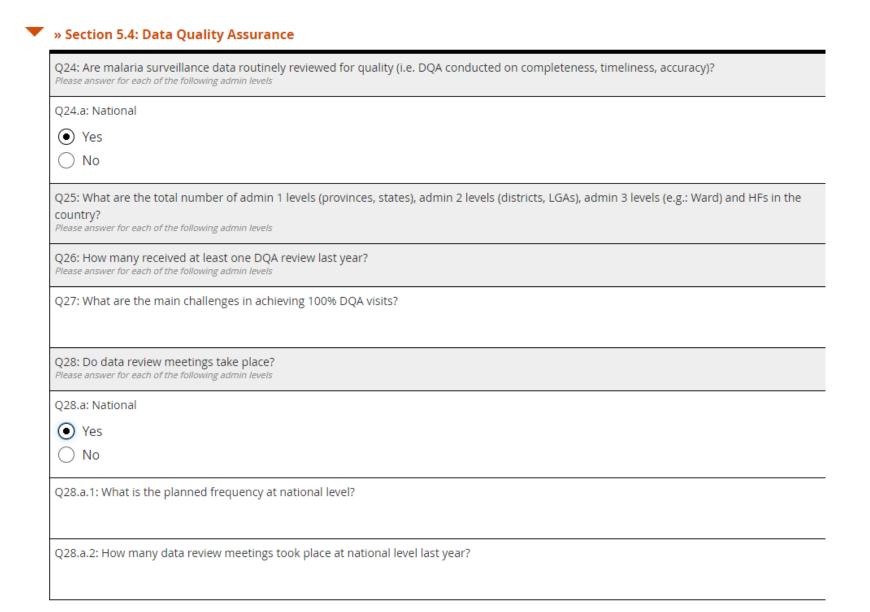

Section 5: Technical and processes » Section 5.1: Recording Q17: Do you have standardized recording forms at all levels of the health system (e.g. case registers)? Please answer for each of the following admin levels Q17.a: National Yes O No Q17.a.1: Are they paper-based or electronic? Paper-based Electronic Q17.a.1.1: If electronic, are they implemented nationwide in all provinces/ districts? ○ Yes O No This field is required Q17.f: Community level ○ Yes ○ No This field is required

▼ » Section 5.2: Reporting

Q18: Do you use standardized reporting tools at all levels of the health system? Please answer for each of the following admin levels
Q18.e: Community > Health facility
Yes
○ No
○ NA#
Q18.e.1: In what format do malaria case data get reported in at community level?
O Paper based
○ Electronic
This field is required
Q19: Does frequency of reporting change depending on transmission intensity/place on elimination continuum?
Yes
○ No
Q19.1: What is the reporting frequency expected for high versus low transmission settings? Please answer for both transmission settings
Q19.1.a: High transmission
Q19.1.a: Low transmission
Q20: Do you have a mechanism for tracking elimination activities such as an elimination specific dashboard? What specific analyses or visualization
do you use?

» Section 5.3: Analysis

Q21: Is there a dedicated person responsible for conducting data analyses at each admin level? Please answer for each of the following admin levels	
Q21.a: National	
Yes	
○ No	
Q22.a: How do they do the analyses? What tools/dashboards etc?	
Q21.f: Community level	
Yes	
○ No	
○ NA#	
Q22.f: How do they do the analyses? What tools/dashboards etc?	
Q23: What are the main challenges in data analysis at each level?	

NMCPs who have already filled the questionnaire

Senegal – Dr Latsouk Gnilane Diouf

Mozambique – Dr Baltazar Candrinho

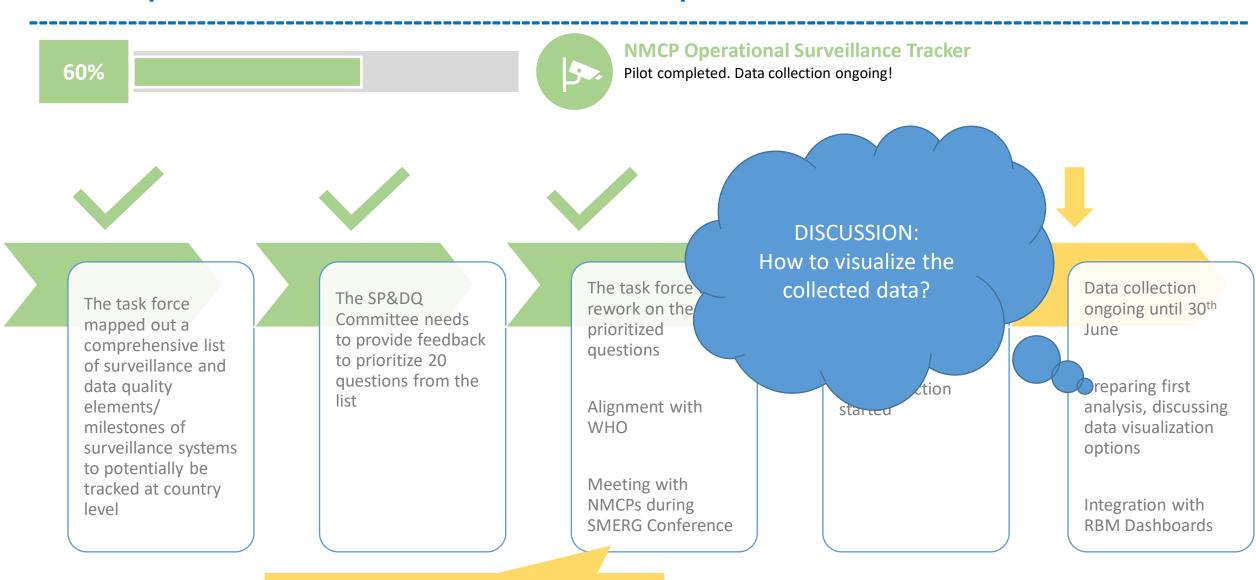

Nigeria – Dr Chukwu Okoronkwo

Ghana - Dr Wahjib Mohammed

Guyana – Dr Kashana James

NMCP Operational Surveillance Tracker Next Steps

To finalise the long list of milestones/indicators and prioritise the top 20 ones to monitor NMCP Operational surveillance milestones

Platforms use

Country	Case data: Platform used	Commodity data: Platform used	Ento data: Platform used	Vector data: Platform used
Country X	DHIS2	DHIS2	DHIS2	DHIS2
Cabo Verde	DHIS2	na#	na#	na#
NIGERIA	DHISv2	NHLMIS	Red Ross application	DHISv2
Mozambique	SISMA (DHIS2)	not yet	SIIM/iMIS (DHIS2)	SIIM/iMIS (DHIS2)

Disaggregation of case data

Country	Case data: Disagg. by age	Case data: Disagg. by sex	Case data: Lowest adm. level	Is there a georeferenced list of health facilities	Is the list updated at least annually?	Is CHW data integrated at HF level?
Cabo Verde	Yes	Yes	Health facility	No		
Country X	Yes	Yes	Health facility	Yes	Yes	YES, integrated.
Mozambique	Yes	Yes	Health facility	Yes	Yes	na#
NIGERIA	Yes	Yes	Health facility	Yes	No	integrated with case data at the HF level

Private sector reporting

Country	Private hospitals	Pharmacies/ drug shops	Informal practitioners/ vendors	Proportion of private sector reporting
Cabo Verde	Yes	NA	NA	100% only in the case of positive tests
Country X	Yes	NA	NA	100% for positive cases.
Mozambique	No	No	No	NA#
NIGERIA	Yes	No	No	between 50-60%

Automation of reports and visualization

Country	Is the malaria information system capable of producing automatic reports and visualizations?	How frequently are bulletins generated?
Cabo Verde	Yes - Both	na#
Country X	Yes - Both	quarterly
Mozambique	Yes - Dashboard	
NIGERIA	Yes - Report/ bulletin	quarterly
