
Integrated Vector Management (IVM)

Raman Velayudhan
Vector Ecology and Management Unit
Control of Neglected Tropical Diseases

Recommendations

1. Strengthen the promotion of IVM on the global agenda.
2. Launch a global advocacy strategy on IVM and support national advocacy strategies.
3. Strengthen capacity-building through development of a comprehensive training package,
4. including modules for different purposes and contexts.
5. Establish networking on IVM, including the development of a working group, the initiation of an annual global stakeholder meeting, and the development of a database of partners.

Cont

6. Develop a prioritized research agenda to strengthen the evidence base for IVM and promote implementation of key research.
7. Demonstrate and document new case examples of IVM.
8. Develop a system for evaluation of IVM, including an appraisal of existing tools, with indicators and methods for cost analysis.
