

RBM PARTNERSHIP TO END MALARIA

**RBM Country Regional Support Partner Committee (RBM/CRSPC) Central Africa
Malaria Programs and Partners annual review and planning meeting, Brazzaville,
Republic of Congo 9-12 August 2022.**

Meeting Participants Group photo

MEETING REPORT

Introduction

Since UNOPS adopted the travel restriction policy due to COVID-19, RBM Partnership to End Malaria Country Regional Support Partnership Committee (RBM/CRSPC) has been conducting its annual meetings with National Malaria Control/Elimination Programmes and its partners virtually for the last two years.

RBM/CRSPC partners learned a lot during this process of organizing the meetings virtually. Due to a number of challenges, the virtual meeting methods were not convenient to deliver the expected results due to several challenges: This includes a. reducing a significantly condensed 4 - 5 days agenda to a 3 hour meeting b. fatigue from long hours of virtual meetings c. CRSPC was forced to focus on only a few of the high priority agenda items d. Many countries struggled to connect to the virtual meetings due to poor internet bandwidths e. the virtual meeting format also reduced time for bottleneck solving, the opportunity to discuss one on one with countries, and informal peer to peer interactions.

With the relaxation of the COVID-19 related lockdown situations in most of the countries, and for the reasons indicated above, CRSPC started organizing this year's annual National Malaria Programmes and Partners meetings face-to-face while observing COVID-19 prevention protocols set by the UN and by countries.

The Central Africa Malaria Programs and Partners annual review and planning meeting is the fourth of a set of four separate meetings that CRSPC organized in 2022. The modality of attendance in these meetings was hybrid (in-presence and virtual via the zoom platform) in order to limit the number of attendants at each meeting as part of mitigation measures to reduce the risk of COVID-19 transmission while in meeting. The remaining stakeholders would also be given an opportunity to join virtually for specific agenda items of their interest.

The four (04) day Central Africa meeting was attended by delegates from 08 countries including: **Cameroun, CAR, Chad, The Republic of Congo, The Democratic Republic of Congo, Equatorial Guinea, Gabon, Sao Tome & Principe.** In addition, representatives from the following partners/other RBM working groups also participated either in-presence or virtually in the meeting: WHO GMP/AFRO, UNICEF, USAID/PMI, BMGF, GFATM, ALMA, AMP, CHAI, PATH, MMV, PSI, IFRC, ACB, UNITAID, ECCAS (Regional Economic community), SMERWG, SBCWG, VCWG, MSWG.

The meeting was held at the Grand Hotel de Kintele, Brazzaville, Republic of Congo 09-12 August 2022.

Meeting Objectives

The main objective of the meeting was to continue to engage National Malaria Programmes and partners to review the status of implementation of national malaria programmes, the impact of the COVID-19, identify major implementation bottlenecks/challenges, lessons learnt, and the implementation support required in 2022/2023.

The specific objectives of the meeting were to:

1. Engage the National Malaria Programmes and partners to review the progress, identify malaria programme implementation bottlenecks, challenges, share best practices and propose solutions in the context of COVID-19;
2. Track progress and lessons learned in the process of the implementation of High Burden to High Impact approach, and continental wide campaigns such as Zero Malaria Starts With Me;
3. Track the impact of COVID-19 and the status of commodities availability and preparedness for 2022;
4. Update the country specific programmatic and financial gap analysis which will serve as tool for additional resource mobilization including portfolio optimisation;
5. Update on the latest developments in malaria;
6. Identify and prioritize the malaria programme implementation bottlenecks for technical support during 2022/2023;
7. Orientation on the next cycle of Global Fund application planning and support;
8. Orient National Malaria Programmes, partners, CCMs and CSOs on community rights and gender approach and the malaria matchbox tool.

Outcomes of the Meeting

The meeting provided an opportunity to engage National Malaria Control Programmes and Partners to review the status of implementation of national malaria programmes, identify major implementation bottleneck/challenges including the impact of the COVID-19, lessons learned, and the implementation support required in 2022/2023. It also allowed for progress and lessons learned from the High Burden High Impact approach evaluation exercise to be shared more broadly as well as Zero Malaria Starts With Me, update on the latest developments in malaria and orientation on community rights and gender approach and the malaria matchbox tool.

As 2023 is the start of the new Global Fund funding (NFM4) cycle, national malaria programmes and partners were oriented on the highlights of the global fund application tools for the 2024-2026 funding cycle.

The meeting also provided an opportunity to identify some of the malaria programme implementation bottlenecks that compromise the efficient utilization of existing funds and for which countries require additional technical support from Global Partners such as RBM in addition to the efforts being made at country and sub-regional levels. Sharing of best practices was among the highlights of the meeting.

The Overall Outcomes of the Meeting were:

- Engaged the National Malaria Programmes from almost all countries together with and partners and reviewed the progress, identified malaria programme implementation bottlenecks, challenges, shared best practices and proposed solutions in the context of COVID-19;
- Shared lessons learned in the process of the implementation of High Burden to High Impact approach, and continental wide campaigns such as Zero malaria starts with me;
- Updated the impact of COVID-19 and on the status of commodities availability and preparedness for 2022;
- Updated the country specific programmatic and financial gap analysis which will serve as tools for additional resource mobilization including portfolio optimisation;
- Updated on the latest developments in malaria such as the vaccine roll out;
- Identified and prioritized the malaria program implementation bottlenecks for technical support during 2022/2023;
- Provided orientation on the next cycle of Global Fund application planning and support.
- Provided orientation training to National Malaria Programmes, partners, CCMs and CSOs on community rights and gender approach in malaria programming and the malaria matchbox tool;
- Updated on the Global Malaria Dashboards and the procedure to apply for TA online.

In conclusion, the meeting was a success as it was attended by representatives of all invited countries from the Central Africa sub-region and partners. Furthermore, the main objective of the workshop was achieved as shown in the Meeting evaluation.

Opening Session

The meeting was officially opened by the Hon. Minister of Health and Population of the Republic of Congo, Gle Gilbert Mokoki. The Hon Minister expressed the gratitude of the Republic of Congo to RBM partnership to End Malaria for holding the Central Africa Program Managers and Partners meeting in Brazzaville. Furthermore, he also mentioned that like in many countries in the Central Africa region, malaria remains a serious public health concern and constitutes the first reason for consultation in the health facilities. He stressed that despite the efforts of the Government to allocate more domestic resources to the fight by keeping malaria high in the national development agenda there is still a lot to do. He therefore invited the community of partners to continue supporting the efforts of endemic countries through the provision of technical assistance and funding for the planning the implementation and the evaluation of

interventions. The Hon Minister invited the community of partners to continue providing both technical and financial support to fill the programmatic and funding gaps. Furthermore the Hon Minister stressed on the need for countries to increase collaboration amongst themselves through joint planning and implementation of interventions and invited ECCAS to take the lead in the design, implementation and coordination of such initiatives.

Dr Corine Karema, the Interim RBM CEO, said that she was pleased that this year's meeting was organized face to face after two years of challenging virtual meetings. She also reminded the audience of the importance of such forums which gives an opportunity to really discuss country implementation progress, challenges and share valuable updates from partners, particularly at this point in time where the countries are preparing for the next Global fund application cycle. She also congratulated the programmes for the various interventions and services they were able to implement despite the threat of Covid-19 though some of them were still pending. In her speech, the RBM Interim CEO reminded the meeting that this was an important period for replenishment of the Global Fund NFM4 as a result of this, countries need to update their NSP in readiness of submission of applications particularly for those countries that would submit in March 2023. She encouraged countries and partners to continue to engage for the success of programme implementation in order to accelerate and combine our efforts to eliminate malaria. She thanked the Senegalese authorities for accepting to host the meeting and having support for malaria Control at the highest political level. She also thanked countries, partners and organizers of the meeting.

Dr Jackson Sophiano Sillah, On behalf of WHO/ AFRO regional Director Representative, reiterated the importance of solid partnerships in the fight against malaria. He also congratulated the countries and the partners for all their efforts despite the difficult context imposed by the COVID19 Pandemic. Dr Sillah reiterated that in line with its mandate, The World Health Organization Global Malaria Program, Africa Regional Office, and country Offices will continue to work with the Ministries of Health through the National Malaria Control Programmes and in collaboration with all partners to provide the required technical assistance and guidance in the planning, implementation and evaluation of interventions and services especially for malaria programs reviews, stratification, national strategic plans development and implementation where ever needed.

Dr Ludovic Fiomona Tamadea, on behalf of her Excellency the Commissioner for Social Affairs of the Economic Community of Central African States (ECCAS), thanked The RBM Partnership to End Malaria for the continued collaboration and support. Referring to RBM/CRSPC support, he mentioned the ongoing technical assistance that is being provided to ECCAS for the development of Regional Malaria elimination plan, and the long term support to help coordinate the implementation of ECCAS malaria related activities including those outlined in the regional strategic plan.

Meeting Modality and Participation

Meeting Modality

Presentations were made in plenary which were followed by discussions on technical updates, countries implementation achievements, best practices, challenges and technical assistance requirements as well as partners presentation. Side meetings were held with individual program managers, partners, private sector and countries.

Participation

The hybrid (face to face and virtual) meeting was attended by delegates from eight (08) national malaria control/elimination program managers/directors along with malaria M&E Officers, country Global Fund focal persons and other relevant persons from Central Africa countries, international, regional and local partners from the sub-region. There were **53** face-to-face participants and **55** who attended virtually making a total of **108** participants who joined the meeting (Annex II).

Country Presentations

Best Practices Shared

Cameroun, CAR, Chad, The Republic of Congo, The Democratic Republic of Congo, Equatorial Guinea, Gabon, Sao Tome & Principe

Some of the best practices shared include the following.

Cameroun: Improvement of case management in health facilities through the identification of 1000 with 60% of severe malaria cases out of 5700. The health workers and lab officers were then trained on severe malaria diagnosis and treatment. This resulted in an increase in severe malaria diagnosis and a reduction of mortality from 18 to 14 per 100000 between 2019 and 2021.

Central African Republic : Development of a malaria annual operation plan in collaboration with all partners active in the field of malaria control in the country. To strengthen their capacities and encourage ownership, the LLIN mass campaign nets distribution were done through the health facilities instead of the NGOs.

Chad : Combination of enumeration with the distribution in both SMC and LLIN mass distribution campaigns. Integration of private health facilities malaria control activities and development of a contingency plan.

Gabon: Ongoing systematic utilization of rapid Diagnostic tests before delivery of anti malarial in pharmaceutical facilities. The national health insurance covers 80% of consultation and antimalarial drugs. The costs for pregnant women consultation, diagnosis and treatment are fully covered by the insurance. Furthermore, there is an increase collaboration with research institutions (Scientific meetings, therapeutic efficacy tests and sensibility to vectors in sentinelle sites)

Democratic Republic of Congo: Micro Stratification for a better targeting of interventions. Anticipation of campaign macro planning to anticipate delays. Digitalization of campaigns and sensitization on covid 19. Improvement of malaria surveillance through a dashboard developed with the support of MACEPA. Malaria behavior survey (MBS).

Republic of Congo: Establishment of a partnership with AMP Health for NMCP staff training in management and Leadership and enhanced collaboration of the NMCP and Catholic Relief Services especially in LLIN mass distribution planning and implementation.

Equatorial Guinea: Weekly surveillance of malaria cases in both low and high prevalence areas. Development and validation of training manual for malaria case management and supervision modules. Operationalization of health facilities teams for community based approach.

Sao Tome & Principe : Integration of targeted IRS with active case detection, mass treatment and treatment of reproduction sites. With the support of WHO, surveillance is considered as a stand alone intervention in some districts. Detailed investigation of cases, malaria upsurges for better responses.

Impact of COVID 19 pandemic

The COVID19 pandemic impacted the implementation of activities in almost all the countries. The consequences of the pandemic on malaria control activities planning, implementation and monitoring flagged by all malaria endemic countries are almost the same, irrespective of the geographical area. These include the following

- Redeployment of health personnel to COVID-19 response activities
- Restriction of movement, making supervision difficult
- The reluctance of population to visit attend health facilities due to the fear of getting contaminated
- Significant increase in implementation costs
- Perturbation of Procurement and supply management of malaria commodities which created delivery delays, lead time etc.

However, to mitigate the impact of COVID19 pandemic, the Global Fund offered an additional funding mobilization opportunity through the C19-RM initiative.

Technical Assistance Provided in 2022 and the needs for 2022/2023

The TAs needs expressed by the countries for the year 2022 were either through in-country , regional and global level partners including RBM/CRSPC as planned. These technical assistance needs include support to address bottlenecks in Technical/ operation, logistics and SBC plannings for Long Lasting Insecticide treated Nets (LLIN) mass distribution campaigns, Malaria Programme retrospective evaluation, conducting malaria programme reviews and developing national malaria strategic plans, and development of a behavior change communication (SBCC) strategies, resource mobilization plans, roll out of the High Burden High Impact approach action plans, malaria gap analysis, launch of Zero Malaria Starts With Me Campaign, CRG- Malaria matchbox assessment implementation and support to RECs in the development of regional Malaria elimination strategic plans among others.

For 2022 countries indicated their TA needs. Emphasis was made on the need to continue the support to countries, especially those categorized as priority 1 by the Global Fund in conducting Malaria CRG-Matchbox assessment exercises including the TA needs for Global fund application for the submissions to be made in early 2023. These TA needs were compiled and shared with all partners through RBM website to ensure the triage mechanism based on expertise and availability of financial and human resources.

Policy Updates and Partners Presentations

The meeting also served as an opportunity for partners to hold different discussions in order to provide countries and partners with updates on the key priority areas and ongoing activities. The key updates included the following:

- Technical and policy updates from WHO
- Updates on new tools and approaches in malaria prevention and control
- Updates from the different RBM working groups and CRSPC workstreams.
- Update on the Global Fund application process and tools
- Updates on the implementation of the Zero Malaria Starts with Me! Campaign
- Findings of the High Burden and High Impact approach evaluation findings
- Updates from the ECCAS on cross border collaboration
- Updates on Sub-Regional perspectives of malaria control and best practices in Cross-border coordination and collaboration by WHO
- Updates from ACB: Presentation, roles and responsibilities
- Updates from the Bill & Melinda Gates Foundation on its priority areas and new approach to working more closely with the Programs.

Individual Regional and Country Consultations

- RBM Interim CEO, Dr Corine Karema organized side individual side meetings with all NMCP managers /representatives the following issues were discussed

- The collaboration between RBM Partnership and the countries.
- What RBM can do more from country perspective to support the fight against malaria
- Countries critical needs in terms of Technical assistance support
- The specific issues that countries are facing and that they would like to be taken at the Global level.
- RBM, Interim CEO, Dr Corine Karema also had a meeting with Dr Moeti, WHO Africa Regional Office Director . The following issues were discussed
 - The excellent collaboration between the RBM Partnership to End Malaria, WHO AFRO/GMP and country Offices
 - The relations with the Global Fund and the low absorption of Global fund resources for malaria control, which calls for more flexibility in the disbursement procedures
 - The availability of The RBM Partnership to End Malaria to provide support if need be to WHO for the MPRs/ Strategic Plan development /adjustment
 - The introduction of the new malaria vaccine
- BMGF, meeting to engage with program managers and respond to clarification questions that they may have on what BMGF does, its areas of focus and the mechanisms that can be used to provide direct support to programs
- Conference dinner with country delegates organized by MMV and Fosun to present on post-discharge malaria chemoprevention, part of the newly released WHO chemoprevention guidelines.

In addition to the above mentioned consultations, many partners seized the opportunity of CRSPC meeting to engage bilaterally with countries and amongst themselves to explore the ways of better collaboration/coordination which will lead to increased support to countries

Other Decisions

- The Central Africa countries elected Cameroun NMCP, represented by the M&E focal person, M. Patrick Ervey Essame, to Seat on behalf of the Central Africa region in the RBM CRSPC Steering Committee with effect from August 2022.

Next steps & Follow-up

- Finalize the implementation support needed by the countries for 2022/2023;
- Follow up the implementation of the TAs in 2022 and 2023 especially those TA related to CRG Malaria Matchbox which was recommended by the Global fund to some countries in preparation of the NFM4 applications DRC and CAR ;
- Follow up on some of the suggestions and recommendations forwarded by countries;
- Follow up with countries and partners to as much as possible implement TAs that need to be completed before the commencement of the work on the GF NMF4 in 2023, especially for those countries applying for window 1 (March 23) in order to minimize the burden of activities in 2023.

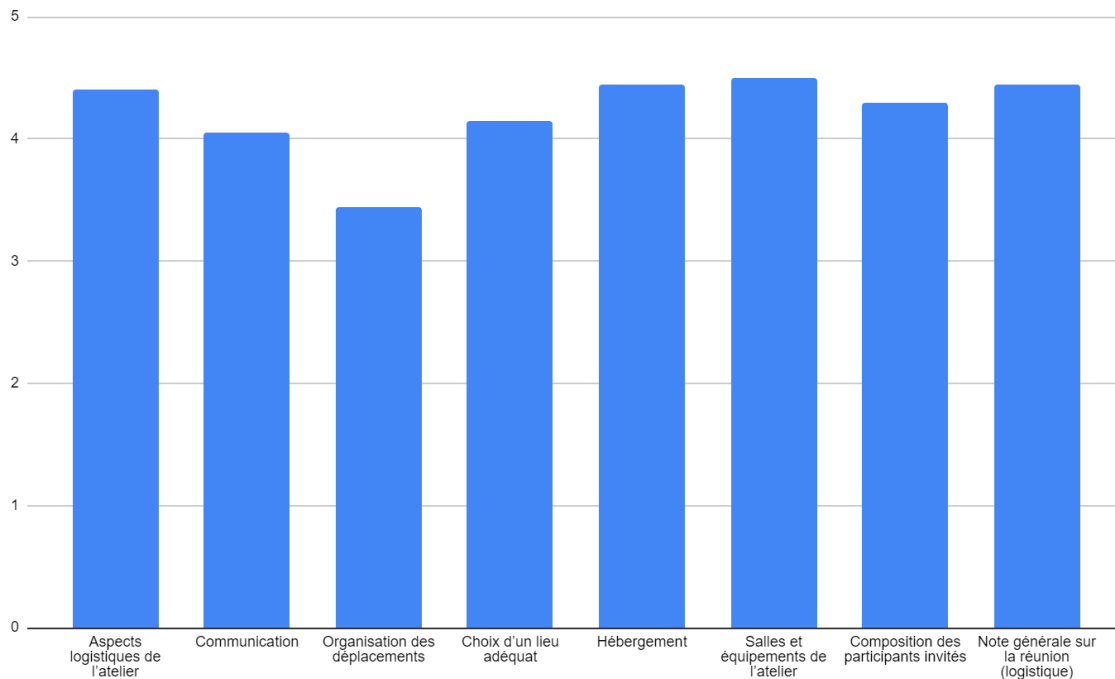

- Prepare countries for the orientation meeting on GF application process planned for December especially the gap analysis; and ensure bottlenecks are addressed to ensure the current GF grants are fully expended by the end of the grant.

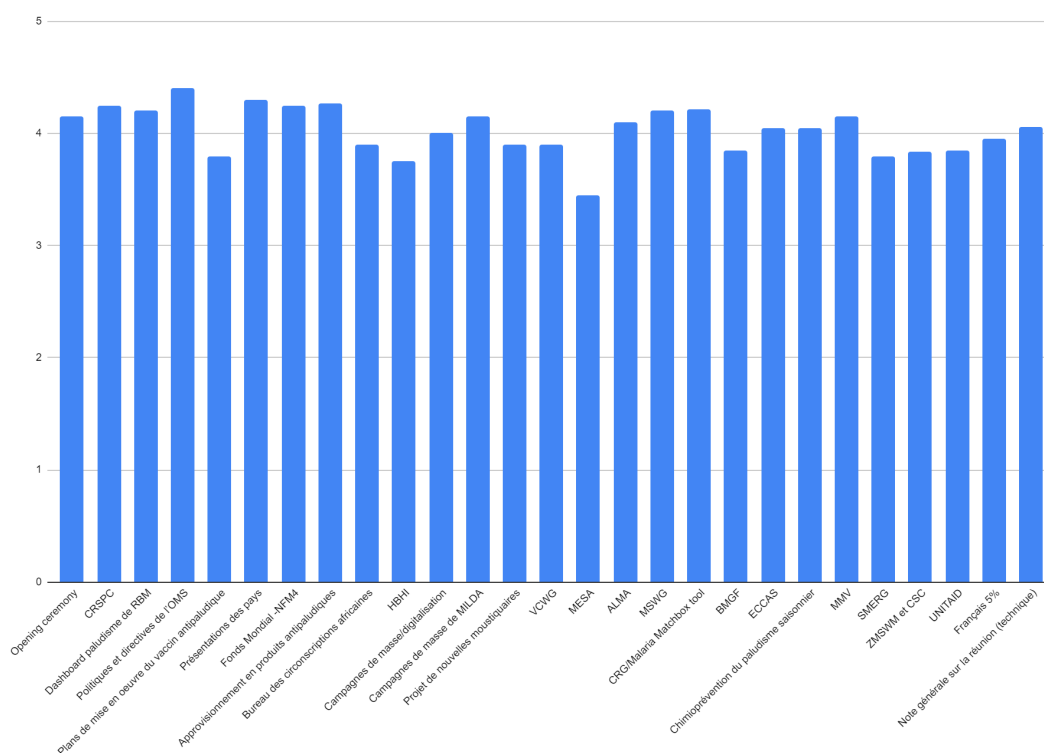

Meeting Evaluation:

At the end of the meeting, the participants (N= 22) provided feedback on the logistics as well as the technical aspects of the meeting.

In general, the participants rated the meetings high in the scale of 1 lowest to 5 highest both logistical arrangements and technical aspects as indicated in the charts below.

In relation to the agenda, a majority of participants indicated that the four meeting days were not enough. They suggested that a 5 days meeting would be more convenient to discuss all agenda items.

ANNEX I- MEETING AGENDA

Day 1 (Tuesday 9 August 2022)

Time	Details of activities	Presenter / Facilitator	Moderator
08:00	Registration	Organisers	Rayana NEHEME
08:30	Welcome Remarks	UNICEF Congo Country Rep, Dr Chantal Umutoni	Dr Melanie RENSCHAW / Dr Peter OLUMESE
08:40	Welcome Remarks	WHO Congo country Rep Dr Lucien MANGA, Représentant	
08:50	Welcome Remarks	ECCAS Representative, Dr Ludovic FIOMONA TAMADEA,	
9:00	Welcome Remarks	Interim CEO, RBM Partnership to End Malaria Dr Corine KAREMA,	
9:10	Welcome Remarks	WHO AFRO, Representative	

9:20	Opening remarks	H.E Gen. Gilbert MOKOKI, Minister of Health and Population	
09:35	Agenda, Items, Objectives and meeting outcomes	CRSPC	
09:50	Groupe photo with Guest of Honor	Organizers	
10:00	Coffee Break	Organizers	
10:30	Updates of implementation support by CRSPC and priority areas for 2022 /2023. Discussions	CRSPC	
10:50	Updates on RBM Malaria Dashboard , Discussion	Data Initiative	
11:25	Updates on WHO Malaria Policies and Guidelines, Discussion	WHO	
13:00	Lunch Break		
14:00	Country Presentations - Programme Implementation		
14:00	Cameroon	Malaria Program Managers	WHO MACT
14:30	Republic of Congo		
15:00	Gabon		
15:30	Discussions		
16:00	Coffee Break		
16:30	Equatorial Guinea		
17:00	Central African Republic		
17:30	Discussions		
18:00	END of Day 1		

Days 2 (Wednesday 10 August 2022)

Time	Details of activities	Presenter / Facilitator	Moderator
08:30	Democratic Republic of Congo		Dr Ludovic FIOMONA TAMADEA
09:00	Sao Tome & Principe		
09:30	Chad		
10:00	Discussions		
10.30	Coffee Break		

11.00	Updates on subnational tailoring and targeted malaria interventions,	Dr Noor/WHO	CRSPC
11.30	Discussions		
12: 30	Lunch Break		
13:30	Updates on the Strategy to Respond to Antimalarial Resistance in Africa		
13:50	Malaria Vaccine Roll out Plan	WHO, IVB	
14:10	HBHI approach evaluation and the lessons learned, Discussions	Hilaire Zon	
16:00	Coffee Break		
16:30	Updates from Bill and Melinda Gates Foundation		
16:50	Discussion		
17:20	END of Day 2		

Day 3 (Thursday 11 August 2022)

Time	Details of activities	Presenter / Facilitator	Moderator
08:00	Orientation on Global Fund's next application cycle - NFM4	Global Fund	CRSPC
08:30	Malaria commodities procurement lead times, commodities in pipeline and the wayforward	Global Fund	
9:00	Overview of the Africa Constituency Bureau (ACB)	ACB	
09:30	ITN mass distribution campaign and the role of digitalization	AMP	
10:00	Coffee Break		
10:15	Planning and implementation of ITN mass distribution campaigns (including experience in continuous distribution)	AMP , CDWG	
10:45	Updates on the new nets projects	PSI	
11:00	Updates from the Vector Control Working Group; new tools and the <i>An. stephensi</i> threat.	VCWG,	
11:15	Evidence Examination exercise on <i>An.Stephensi</i> en cours	MESA	
11:30	Updates from MMV	MMV	
12:00	Orientation on the ALMA legacy agenda including scorecard tools, youth agenda and End Malaria Councils	ALMA	
12:40	The role of multisectoral actors in the sustainable fight against malaria	MSWG	
13:00	Lunch Break		
14:00	Orientation training on the Community Rights and Gender (Malaria Matchbox tool) modules (NMCP, Consultants, Partners, CSO, CCM)	Denise Meya, Olivia Ngou, CReMA, FM/CRG	

16:00	Coffee Break		
16:15	Orientation training continued		
17:45	End of Day 3		

Day 4 (Friday 12 August 2022)

Time	Details of activities	Presenter / Facilitator	Moderator
08:00	Sub-Regional perspectives of malaria control and best practices in Cross-border coordination and collaboration	ECCAS	CRSPC
09:50	Updates on Seasonal Malaria Chemoprevention	SMC Alliance	
10:10	Operational Surveillance tracker initiative	SMERG	
10:30	Coffee Break		
11:00	ZMSWM and SBC efforts in country	SBC WG	
11:20	Zero Malaria Business Leadership Initiative, Milestones, impact and next steps	Speak Up Africa	
11:40	Updates on the UNITAID's malaria activities	UNITAID (Alexandra)-Virtual	
12:00	Updates from UNICEF	UNICEF	
12:20	Nomination of Country representatives at CRSPC Steering Committee	CRSPC	
12:40	Closing the meeting - Summary of the key points, recommendations, the way forward and meeting evaluation.	CRSPC	
13:00	Lunch Break	CRSPC	
14:00	Bilateral discussions with Programme Managers and partners		
16:00	END of Meeting
