PURPOSE OF MIP WG

Align RBM partners on best practices and lessons learned in MiP programming to help achieve higher coverage in MiP interventions globally.

Promote and support WHO strategy to control MiP:

- Insecticide treated bed net use (ITN)
- Effective case management
- Intermittent preventive treatment (IPTp) in areas of moderate to high malaria transmission

RBM MIP WG Leadership

Co-Chairs:

- Julie Gutman, Medical Officer, CDC
- Chonge Kitojo, Program Specialist, USAID Tanzania

Secretariat:

- Kristen Vibbert, Jhpiego

<u>Current Advisory Board Members</u>	<u>Regional Network</u>
Nnenna Ogbulafor, Nigeria	Cameroon, Zambia
Sattu Issa, Sierra Leone	Malawi, Rwanda
Mildred Komey, Ghana	Liberia, Zimbabwe
Jane Nabakooza, Uganda	Kenya, Tanzania
Frederic Guigma, Burkina Faso	Niger, Mali, Senegal, Guinea
Chanelle Muhoza, Burundi	DRC, Madagascar, Benin

MiP AT A GLANCE

In 2021:

- **13.3 million pregnancies in SSA affected by MiP**
 - **505,000** infants born with low birthweight
 - **164,000** stillbirths in 2019 (20% of stillbirths in SSA)
- **49%** of pregnant women sleeping under an ITN
- **35%** of eligible pregnant women received the recommended 3+ doses of IPTp
- **17%** of women attending ANC1 do not receive any IPTp

ANC and IPTp coverage in sub-Saharan Africa

CALL TO ACTION: Speed Up, Scale Up IPTp!

I speak to every young woman across the whole of Africa. Throughout every pregnancy, I urge you to seek quality antenatal care to protect yourself and your babies from the harmful effects of malaria.

H.E. Dr. Linda Ayade,
First Lady of Cross River State, Nigeria

Intermittent Preventive Treatment of Malaria in Pregnancy

Today, I call on all countries across the continent to speed up IPTp scale up to protect women and their unborn children from the devastating effects of malaria in pregnancy.

H.E. Rebecca Akufo-Addo,
First Lady of the Republic of Ghana

SPEED UP
— IPTp —
SCALE UP

Intermittent Preventive
Treatment of Malaria
in Pregnancy

AREAS OF COLLABORATION

Treatment of MiP in 1st trimester

- WHO recently updated guidance regarding use of ACTs in 1st trimester
- MiP WG disseminated an implementation guidance document
- Document which countries have updated policies
- Incorporate tracking of case management by pregnancy status and trimester into DHIS2

INTER-AGENCY TECHNICAL BRIEF

Treatment of uncomplicated *P. falciparum* malaria in the first trimester of pregnancy: Implementation of the revised WHO treatment guidelines (25 November 2022)

Table of contents

Table of contents	1
Abbreviations	2
Summary	2
Background	2
New WHO recommendation on malaria case management in the first trimester of pregnancy	3
Expected benefits	4
Considerations for implementation of the new recommendation	4
Rationale for this update	6
Comparative data on the treatment of uncomplicated malaria with artemisinin antimalarials and quinine	6
Annex 1. Frequently Asked Questions (FAQs)	9
Annex 2. Number of confirmed exposed pregnancies for each artemisinin treatment type	11

U.S. President's Malaria Initiative

RBM Partnership
Malaria in Pregnancy Working Group
Annual Meeting
Sept 12-13, 2023, RBM HQ, Geneva

Meeting Objectives:

- 1) Discuss opportunities to prioritize MiP as part of the broader ANC platform
- 2) Share, disseminate and discuss new MiP research and innovations with implications for MiP programming
- 3) Disseminate learning from country experiences in improving coverage of MiP interventions
- 4) Develop WG action plan for 2024.

THANK YOU!
