WARO Regional Contribution to SP4

Ongoing - Vector Control Access and Use Assessment Among IDPs

Next - Distribution of 15,000 PBO Mosquito Nets with BHA Support Project

Partners
The past two years have seen a sharp deterioration in the security situation across Burkina Faso’s northern and eastern regions due to the presence of non-state armed groups. Violence has resulted in the emergence of an unprecedented humanitarian emergency in a country more traditionally subject to chronic food and nutritional insecurity.

Violence led to the displacement of more than one million people in just two years and has left 3.5 million people in need of assistance, a 60% increase from Jan 2020 to Jan 2021. Despite rains in 2020, food insecurity and malnutrition remain at alarming levels, especially in areas affected by insecurity. More than 1.5 million people need protection in 2021. As of January 2021, more than 10,000 cases of COVID-19 were confirmed with 118 deaths. Humanitarian needs are the highest since 2018, with 3.5 million people in need of assistance.

From UN-OCHA Report
USG Bureau for Humanitarian Assistance Project in Burkina Faso

Projet d’Assistance aux Populations Affectées par la Crise II (PAPAC)

Total Number of People Affected in the Target Area: 387,204
Total Number of People Targeted (Individuals): 10,500
Total Number of internally displaced persons (IDP) People Targeted: 9,450
Goal

Living conditions of vulnerable displaced populations’ and host communities’ in Burkina Faso’s Centre Nord Region are improved and dignity restored through the delivery of emergency assistance.
