Partnering in the fight to end malaria: what’s new on PMI’s agenda

Dr. Richard Steketee
Deputy U.S. Global Malaria Coordinator
PROVEN INTERVENTIONS

- Insecticide-Treated Nets
- Indoor Residual Spraying
- Case Management (Diagnosis and Treatment)
- Intermittent Preventive Treatment for Pregnant Women
- Seasonal Malaria Chemoprevention

Cross-Cutting Investments

- Supply Chain and Health Systems Strengthening
- Social and Behavior Change
- Surveillance, Monitoring and Evaluation
- Operational Research
To END MALARIA FASTER, We Must

Reach the unreached

Make community health systems better

Keep malaria services safe and resilient

Invest in people and partners closest to those we serve
Improve accessibility to timely, quality data for vector control decision making.
Aspire to **UNIVERSAL VECTOR CONTROL COVERAGE** using optimal insecticides based on local data

Then **REACH THE UNREACHED**

**BURKINA FASO**
Support INNOVATION for existing and new vector control tools
Maintain malaria gains with SUSTAINED VECTOR MONITORING AND CONTROL in the face of new and emerging threats
Support local MALARIA FIGHTERS
THANK YOU
