ACCELERATING THE END OF MALARIA THROUGH MULTISECTORAL APPROACHES

CRS's Strategic Investment in Supporting Multisectoral Malaria Programming

Joseph Lewinski- SP4 Lead

SCP:4 Goal

Multi-sectoral programming is a proven strategy that

- Creates Dual Impact on Two or More Sectors
- Reduces Malaria Burden
- Saves Lives
- Accelerates the End of Malaria

SP4- Strategic Approach

Core Strategic Objectives 2019-2022

1 Country Implementation

2 Global and Country Level Advocacy

3 Resource Mobilization

4 Increase in Multisectoral Malaria Programming

Phase I- Multisectoral Programming with CRS Programs

Phase I- Country Implementation

1. Malaria and Urban Resiliency + WASH

Understanding and improving urban malaria transmission within the Transform Freetown and WASH project

2. Malaria and Humanitarian Response

Improving ITN Access and Use Among IDP Communities with USAID Bureau for Humanitarian Response Project

3. Malaria and Nutrition

Understanding the effects of malaria and malnutrition on outcomes of child health in rural/ hard to reach villages

Phase I- Expansion Projects 2022-2023

Malaria and Agriculture Project (TBD)

SP4 will use additional investment to help support a malaria and agriculture project that focuses on improving the impact that increase farming practices (rice) has on mosquito breeding/ malaria transmission

Malaria and Education Project (TBD)

SP4 will use additional investment to support a malaria and education project that will improve knowledge and access and use of malaria prevention and treatment commodities among school aged children

Global Level Advocacy

The next few years will be critical in our mission to rid the world of one of the oldest and deadliest diseases. If we want to end suffering from malaria once and for all, an inclusive, multisectoral approach will be key.
